SUMMARY

Software Engineer with 4 years of experience specializing in Java-based backend development, microservices architecture, and cloud-native solutions using AWS. Delivered scalable data processing systems and RESTful APIs, improving data ingestion and system performance by up to 30%. Proficient in Kafka, Docker, Kubernetes, and CI/CD pipelines. Drives high-impact engineering solutions that enhance scalability, reliability, and operational efficiency across data-driven and eCommerce platforms.

TECHNICAL SKILLS

- Programming & Scripting Languages:** Java, Python, JavaScript, Shell Scripting
- Backend Development & Frameworks:** Spring Boot, React, Spring Framework, RESTful APIs
- Cloud Platforms & Services:** AWS, EC2, S3, EKS, ECS, RDS, VPC, IAM, CloudWatch, Route 53
- DevOps & CI/CD Tools:** Jenkins, Maven, Terraform
- Containerization & Orchestration:** Docker, Kubernetes, Istio
- Database & Messaging Systems:** PostgreSQL, Apache Kafka
- Monitoring & Incident Management:** Datadog, Sentry, FireHydrant
- Version Control:** Git

PROFESSIONAL EXPERIENCE

Numerator

Software Engineer

Chicago, IL

March 2024 – Present

- Architected scalable backend services to process large-scale consumer purchase datasets, increasing data ingestion throughput by 30% and accelerating real-time analytics delivery.
- Delivered high-performance RESTful APIs supporting high-volume analytical queries, ensuring reliable integration across internal platforms and client-facing applications.
- Refactored data processing pipelines and integrated asynchronous event-driven architecture using Apache Kafka, reducing system latency by 25%.
- Orchestrated cross-functional collaboration with a team of 8+ engineers, data scientists, and product managers, ensuring delivery of analytics-driven product features.
- Deployed microservices-based architecture leveraging Spring Boot, Docker, and AWS services, enhancing system scalability and reducing deployment cycle time by 35%.

Parts Town

Software Engineer

Addison, IL

July 2021 – June 2023

- Orchestrated scalable backend services to optimize real-time inventory and order processing pipelines, increasing order fulfillment speed by 30% and minimizing system latency.
- Designed RESTful APIs handling high-volume B2B eCommerce transactions, strengthening integration with supplier and distributor ecosystems and improving data reliability.
- Eliminated performance bottlenecks in legacy order management systems by refactoring Java microservices and tuning database queries, improving processing efficiency by 35%.
- Directed cross-functional collaboration with engineers, product managers, and QA teams to deliver supply chain enhancements, achieving consistent on-time sprint execution.
- Engineered distributed system components using Java, Spring Boot, and Kafka to enable real-time inventory synchronization, boosting system throughput and reducing manual intervention by 25%.

EDUCATION

Master of Science in Information Technology Management

Illinois Institute of Technology, Chicago, Illinois

August 20XX – May 2025

CERTIFICATIONS

- Achieved AWS Certified Developer – Associate.
- Earned Microsoft Certified: Azure Developer Associate.
